

## Create your own story dice!

You can use the empty template to draw pictures in the boxes to put on your story dice. There is also a page of pictures ready for you as well. You can print out as many dice as you want to make and use the pictures to create your story dice. We have 36 pictures for you so you can make at least 6 dice.

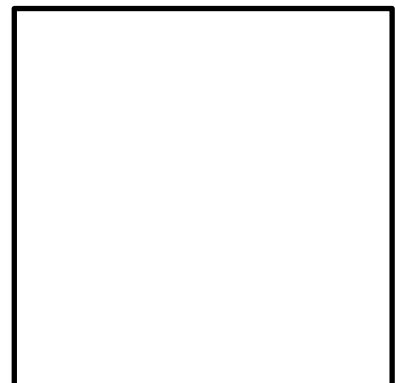

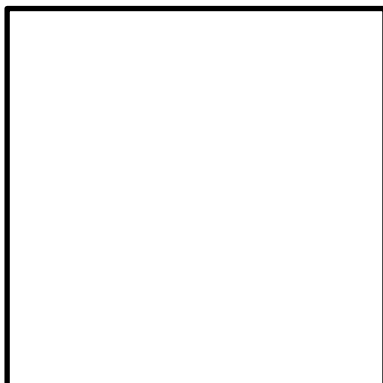

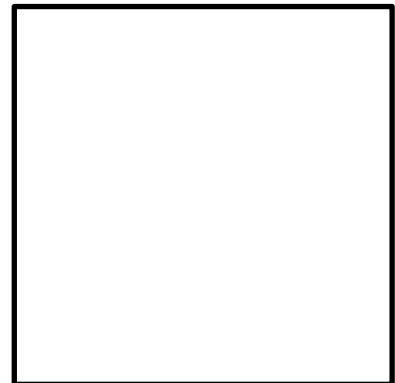

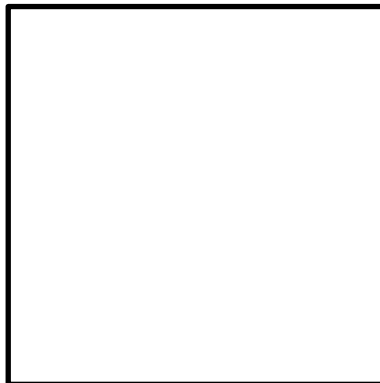

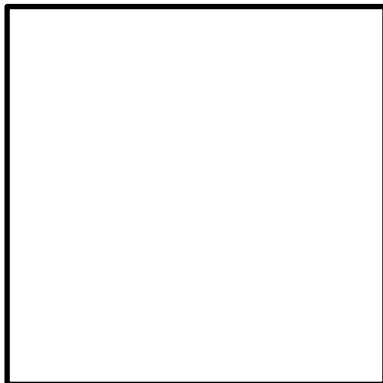

*\*Your dice will last longer if you print it on harder/thicker paper.*

### Make the dice:

1. Cut along the outside of the lines of the picture boxes and paste it on the squares in page 2.
2. Then, cut the die out along its outside border.
3. Fold the die along each side of the six sides (along the lines).
4. With small pieces of clear tape (or use glue), tape each edge to another edge. It should become a cube.
5. Make at least 6 to have a good story game.
6. Have fun creating your own story!

### Game Instructions:

1. Have 2-4 players ready.
2. Throw all the dice.
3. Play rock, paper, and scissors to see who goes first.
4. The first person has to start the story with “Once upon a time...”
5. The person telling the story can choose 1-3 dice to tell each turn.
6. The next person has to follow the story with the other pictures on the table.
7. The last person has to retell the story from the beginning and end the story with “The End.”

Out along the outside border, and fold the inside lines! Print this page out as many times as you need!
